CEO comments

I am pleased to report a positive start of the year, with progress in accordance with plan and consistent with our long-term goals. Sales increased by 81 percent compared to the first quarter of 2017, which is primarily attributable to the many acquisitions that we completed last year. A good indication of the company's underlying performance is the increase in organic sales, which was 27 percent compared to last year. Adjusted EBITDA also increased by 87 percent (pro forma) compared to last year, which I am very satisfied with. The margin on the bottom line, adjusted from IPO costs, improved by 2.6 percentage points.

I am also happy to report that there was a healthy flow of new customers and business to the company during the quarter, which confirms the value in our service offering.

Positive and negative effects of a long winter

The first quarter of the year is low season. The weather at the start of the year had both positive and negative effects on performance in our business segments. Ground Maintenance & Landscaping, which comprises maintenance services of parks and green areas, including snow removal, benefitted from the long winter. However, Landscaping in general was negatively affected, as well as Sports Landscaping, since snow and ice prevents us from engaging in these services. We expect this to even out during the coming quarters.

Strong interest in IPO

In March, the Group became listed on Nasdaq First North. It was an exciting process which generated great interest in our business and future plans. Two themes in particular were reoccurring in meetings with investors: the stability and predictability of our business, and the "green" trend in urban environments, which is very noticeable in a variety of ways and where Green plays an important role.

Compared to many other growth companies, we stand out in that a large portion of our revenue is derived from the public sector and long-term contracts, which helps ensure stable growth over time. We also operate in a niche sector that benefits society at large. In general, people want an abundance of trees, greenery and parks, since it fundamentally impacts their well-being and quality of life.

Green Steps - creating employment opportunities

During the year, we will continue the efforts to achieve our vision of creating a green city that benefits all via entrepreneurship, social responsibility and sustainable business. With this in mind, we will be launching Green Steps during the spring. It is an initiative whereby we will collaborate with our customers and government authorities to get new immigrants and long-term unemployed into the workforce through a combination of training and work experience. The initiative strives to create an inclusive society and ensure that there is a supply of expertise in the labor market over the long term.

Customer value, quality and sustainability

The foundation for sustainable entrepreneurship is our business model, where we rely on decentralized, entrepreneurial local operations that are in sync with customer needs, yet also allow us to benefit from the economies of scale that can be derived from a larger Group. Customer value, quality and sustainability define our efforts and I am optimistic about our continued growth and development.

Our history

Green Landscaping Group is Sweden's leading provider for care and surface planning of outdoor environments. Our business concept is to improve the customer's outdoor environment by offering services that focus on high customer value, long-term sustainability and quality. Green Landscaping was established in 2009 via a merger of four companies working with care of outdoor environments. Since then, the company has expanded through both organic growth and acquisitions.
