

Green Landscaping secures extended contract in central Stockholm

Green Landscaping has been entrusted to continue carrying out outdoor maintenance services in the central city parks Kungsträdgården, Berzelii Park, Norra Bantorget and Strömparterren in Stockholm.

Through a contract with the City of Stockholm Traffic and Public Transport Authority, Green Landscaping has been responsible for outdoor maintenance services in the parks since 2013. The services include ground maintenance, gardening, cleaning, snow removal and gritting. In accordance with the existing contract's extension option, the City of Stockholm Traffic and Public Transport Authority has now decided to extend the cooperation for another two years. The contract is worth around SEK 5 million per year.

"This is one of Green Landscaping's true prestige assignments, and we are very proud to have received the continued trust to take care of some of Stockholm's most beautiful and well visited parks. Green and pleasant urban environments are important for the residents of Stockholm, and the central city parks play a major role in the well-being of the inner city. We will carry out the assignment focusing on customer benefits and quality, just like we have done since it started five years ago," said Kent Ramström, Regional Manager East of Green Landscaping.
