Green Landscaping strengthen the presence in Stockholm's city center

Wins agreement for ground maintenance, surface planning and snow maintenance in the districts of Kungsholmen and Östermalm.

A subsidiary within Green Landscaping Group has, through tenders, been awarded agreement regarding ground maintenance, surface planning and snow maintenance for two additional districts in Stockholm's city center. The districts of Östermalm and Kungsholmen are expanding the Group's already strong presence, which already consists of Norrmalm's district and the municipal central parks Kungsträdgården, Berzelii Park, Norra Bantorget and Strömparterren.

- This agreement greatly strengthens our presence in Stockholm's city center. It provides us with even better conditions for providing our customers and city residents with efficient, affordable and qualitative maintenance of the outdoor environment. We will thus have good conditions to fulfill the overall contract goals for maintenance of parks and green areas to be carried out so that the areas give a decorative impression and that function and safety are achieved. The work will also be carried out so that biodiversity is met and that the parks are welcoming, pleasant, accessible and safe, says result unit manager Christoffer Liljendahl, who with these new agreements is responsible for the industry's largest supply of green space maintenance in Stockholm's city center.

- Now we have a unique position within ground maintenance in the urban environment, which creates conditions for efficiency and new offers through our large presence, concludes Christoffer Liljendahl, who confidently welcomes the new districts to Green Landscaping Group.

The agreement runs, including possible option years, until 2027 and delivery starts on April 1, 2020.
